

Prathmesh Haridas

Latur, Maharashtra, India — [pr.hr1137@gmail.com] — GitHub — LinkedIn

Professional Summary

Software Engineer and a Hindustani Classical musician. Building production healthcare software used across Web, Android, iOS, and Desktop platforms. Outside engineering, I train in Hindustani Classical music under Padma Shri Ustad Shahid Parvez Khan, which sparked my interest in audio systems, human-centered design, and creative technology. Currently focused on SwiftUI and building products that combine software, music, and AI.

Experience

Software Engineer

May 2024 – Present

ChiroSimple (Remote)

- Develop and maintain production healthcare software serving clinics across Web, Android, iOS, and Desktop platforms.
- Built scheduling systems, appointment workflows, clinician availability management, and automated PDF report generation.
- Engineered Stripe payment infrastructure supporting invoicing, refunds, card-on-file payments, and automated fee collection.
- Developed backend services using Firebase, Firestore, Twilio, and GCP Cloud Functions.
- Contributed 265+ production commits while modernizing critical modules within a large legacy codebase.

Flutter Developer

Apr 2023 – Jul 2023

Leazkart

- Improved mobile application performance by resolving frontend bottlenecks and optimizing rendering workflows.
- Integrated REST APIs and enhanced real-time data synchronization across production mobile applications.

Projects

RaagGuru

SwiftUI, AudioKit

- Built a digital riyaz companion for Hindustani Classical musicians by combining tanpura generation, metronome functionality, and real-time pitch analysis into a single application.
- Designed pitch-detection workflows to help students identify sur inconsistencies and track progress across practice sessions.

SessionNotes AI

SwiftUI, AVFoundation, OpenAI

- Built a meeting intelligence tool that transforms long audio recordings into concise summaries, action items, and follow-up tasks.
- Implemented audio capture, transcription pipelines, and AI-powered information extraction to reduce manual note-taking.

SwarLipi Studio

SwiftUI, CoreData

- Created a digital notebook for Indian Classical musicians to organize bandishes, notations, and practice material traditionally scattered across physical notebooks.
- Added offline storage, search capabilities, and categorization workflows for efficient long-term composition management.

Publication

Decentralized Lottery System Using Blockchain

IEEE ICPCSN 2023

- Co-authored and published an IEEE research paper proposing a decentralized lottery system where winner selection and prize distribution are executed through Ethereum smart contracts rather than a centralized authority.

Education

Vishwakarma Institute of Technology

Pune, India

B.Tech in Artificial Intelligence and Data Science

2021 – 2025

Technical Skills

Languages: Swift, Dart, Python, JavaScript, C++, SQL

iOS: SwiftUI, UIKit, Xcode, AVFoundation, CoreData, SwiftData

Architecture: MVVM, Async/Await, REST APIs, WebSockets

Cloud: Firebase, Firestore, GCP Cloud Functions

Tools: Git, GitHub, Stripe, Twilio, Agile/Scrum

Music & Artistic Training

Professional Hindustani Classical Sitar Player

Disciple of Padma Shri Ustad Shahid Parvez Khan

- Advanced training in the Etawah-Imdadkhani Gharana tradition with a strong interest in audio technology, digital creativity, and music-focused software products.
- Intermediate training in Tabla from guru Pandit Suresh Talwalkar with a style that is a sophisticated confluence of multiple gharanas—Delhi, Ajrara, Farrukhabad, Benaras,
